Usama,

While you are in the database, please also find the projected impact on ALS's capacity.

Usama,

I am having a little trouble evaluating laboratory status in the BI-Tool and STS. By how many samples (and by what percentage) would this project put CHM over their monthly capacity?

Thanks,

All,

For scheduling on August 6, 2015, we have one project that requires direction for additional samples. Currently, there are 70 soil SPLP ICP-AES 11+ Metals and Mercury samples scheduled with TAB. Shipping has not started yet for this Case and the Region would prefer to have all samples scheduled with one laboratory, if possible. The Region has also indicated that shipping will occur on one day during the shipping period. Below are the Case details and a table summarizing the laboratories status, funding, and additional comments for this project. This table is also included as an attachment.
